GARDENING BLOG

Gardening For All Ages

Garden Update!

The garden beds have taken off growing and we have even started to harvest some of our herbs, peppers and cucumbers!

What's on the menu?

Teens making breakfast for lunch YUMMY

Teens were in the kitchen making a delicious meal for lunch with pancakes, eggs, toast, home fries and bacon! The teen campers will continue to cook all summer and will harvest from the garden as much as they can!

Plants NEED Water just like us!

Kinder campers helping to water all of our veggies, flowers and herbs!

Kinder 4th of July smooties!

The kinder camp made red, white and blue smoothies for the 4th of July! Each camper helped add one ingredient and they were given the recipes to take home! They also got to try the smoothies and some enjoyed them so much they had smoothie mustaches by the end.

Getting extra help with planting herbs!

We had a small group of kinder campers helping to finishing planting herbs in the garden. They loved smelling the chocolate mint plant and digging in the dirt to plant our thyme, rosemary and cilantro plants.
